

My New Puppy Adventure

This adventure book is for:

Yay, you've got a new puppy!

Bet you're super excited to play, cuddle, and have tons of fun with your new friend. Puppies are like little furballs of happiness, always ready to play and make you giggle. Taking really good care of them is super important so they grow up to be happy, healthy dogs.

Your puppy might be feeling a bit shy or even a little scared because everything around them is brand new. Do you remember your first day at school when you were excited but also a bit nervous? That's exactly how your puppy feels right now!

We at Pet People Vets want to help you and your puppy become the best friends ever. Learning what your puppy loves and how to take the best care of them is going to be a fun part of your adventure together.

Space for drawing your puppy's favourite toy

Just like your friends at school like different games, each puppy has things they love the most. Some puppies love lying in the sunshine, while others are curious explorers who can't wait to sniff and see everything. Remember, every puppy is special!

Here's a helpful rule for being a great pet friend: "Always be as gentle with your pet as you are with your friends."

That means no rough play—no pulling hair and definitely no pulling on your puppy's ears or tail. Being gentle and kind is how you show your puppy you're their best friend.

Taking care of your puppy means making sure they always have fresh water to drink and yummy puppy food to eat so they stay healthy and strong. People food isn't good for puppies because it can make their tummies hurt. Puppies also like having a cosy spot where they can relax or hide when they need a little break. If your puppy is in their favourite hiding spot, maybe they're feeling a little shy or just need some quiet time.

Being super gentle is very important. Puppies are still little and can get scared or hurt if things get too wild. But they do love gentle hugs and playful games with you!

Please don't scare your puppy with loud noises or sudden moves. It might seem funny to you, but to a little puppy in a new place, it can be pretty scary. Always be kind and loving to make them feel safe and happy.

From all of us at Pet People Vets,
we're excited to give you the:

SUPER PUPPY OWNER AWARD

This special award goes to

For being an amazing friend and caregiver to your new puppy.
